

## Messaging Solutions

- Banking / Finance -

### Key Benefits

- SMS is available worldwide
- Reliable SMS dispatch via direct connections to mobile network operators
- No data connection (mobile network / WLAN) needed
- No app download required as for photoTAN or pushTAN
- Security features like IPsec and HTTPS
- smsTANs are sent via our secure and GDPR compliant systems hosted in PCI\_DSS / FACT / ISO 9001 certified German data centers.

### How SMS help

- Since the PSD2 Payment Directive came into force, all online and card payments must be mandatorily approved by two independent characteristics from the categories knowledge, possession or inheritance.
- mTAN or smsTAN are particularly suitable for two-factor authentication because they are more flexible than, for example, photoTAN, pushTAN App or TAN generator.
- An smsTAN is a mobile password with limited validity and is used for online transfers, approval processes and logins.
- Account balance and bank overdraft warning, Transaction warnings for large amounts, Payment reminders, SMS-enabled customer service.
- Please contact us for concepts of this kind, we are happy to advise you.

## Messaging Solutions

High acceptance by users  
98% of all SMS messages  
are opened

Quick and efficient

compliant

Increased data security

Increased  
customer satisfaction

Simple integration,  
operation and usage

dicomsys is an experienced provider of a cloud-based messaging platform for mobile communication.

The developed Multi-Channel Communication Platform as a Service (CPaaS) of dicomsys enables companies worldwide to reach customers personally and securely. With SMS and connectivity to popular messaging channels, such as Facebook Messenger, WhatsApp and RCS, communication is converted into measurable revenue.

Intelligent chatbots make it possible to build a long-term digital customer relationship and achieve efficiency through automation.

As a strong partner for successful customer communication, dicomsys aims to be the most important infrastructure provider for cloud messaging and conversational commerce in Germany.
