

Healthcare Messaging Solutions

- Smart Medication -

Key Benefits

- 69% of people would like to be reminded to take their medication
- 42% of patients forget to take their medication
- Encourage patients to stick to their treatment plans and medication by text messages
- Send an SMS with the exact dosage of each medicine at the appropriate time.
- Sending of follow-up SMS for therapy monitoring and observation of the treatment success.
- Sending SMS reminders to patients to order a follow-up prescription

How SMS help

- We are currently working with pharmaceutical companies and medical institutions to reduce the number of recurring visits to the doctor by patients. These are still necessary in many areas today in order to tailor the medication to the patient's needs, e.g. pain management, blood sugar disorders etc.
- Text messaging is a great help in the communication needed to tell the patient the exact time and dose of medication.
- Please contact us for concepts of this kind, we are happy to advise you.

Messaging Solutions

High acceptance by users
98% of all SMS messages
are opened

Simple integration,
operation and usage

dicomsys is an experienced provider of a cloud-based messaging platform for mobile communication.

The developed Multi-Channel Communication Platform as a Service (CPaaS) of dicomsys enables companies worldwide to reach customers personally and securely. With SMS and connectivity to popular messaging channels, such as Facebook Messenger, WhatsApp and RCS, communication is converted into measurable revenue.

Intelligent chatbots make it possible to build a long-term digital customer relationship and achieve efficiency through automation.

As a strong partner for successful customer communication, dicomsys aims to be the most important infrastructure provider for cloud messaging and conversational commerce in Germany.
